EEBIOMASS

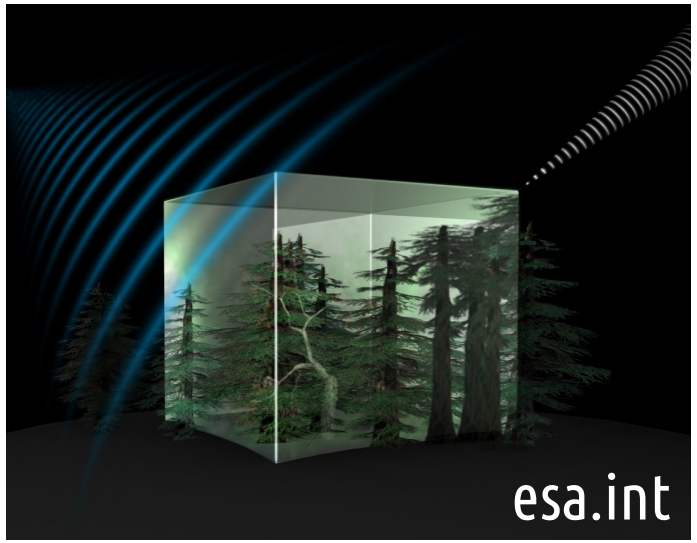
Project Office BIOMASS

Workshop #8
Uncertanties

by Nuno Carvalhais & Stefanie Burkert

BIOMASS

"the primary objective of BIOMASS is to **improve our understanding** on the role of the **land biosphere** on the **global carbon cycle in a context of climate change**"



BIOMASS

Secondary mission objectives, including mapping **sub-surface geology**, measuring terrain **topography under dense vegetation** and estimating **glacier and ice sheet velocities**.

General goals

1. to **synthesize**, produce and disseminate relevant information within the biomass community;
2. **identify gaps** and investigate solutions within the context of BIOMASS; and
3. establish **communication** within the broader context of the BIOMASS mission.

Programme

13:00 – 13:10 Welcome

Nuno Carvalhais, Max-Planck Institute for Biogeochemistry

13:10 – 13:40 Uncertainties in global and national biomass estimations using space-based data + discussion

Martin Herold, GFZ German Research Centre for Geosciences, Helmholtz Centre Potsdam

13:40 – 14:10 High resolution remote sensing of forests: dealing with uncertainties in data and methods + discussion

Emily Lines, University of Cambridge

14:10 – 14:30 joint discussion, wrap up & Outlook

Thank you and enjoy the workshop!

Upcoming events

- **EGU 2023:**

28.04.2023, 08:30 – 08:40, Hui Yang: Global Patterns of tree wood density (talk)

25.04.2023, 16:15 – 18:00, Siyuan Wang: Assessing Global Disturbance Regimes based on high-resolution biomass observations (Poster session)

- **Next webinar topics:**

Future of forest demography – May 25, 2023, 13:00 – 15:00 CET
(Arthur Argles, Peter Cox , Annemarie Eckes-Shephard, Rosie Fischer, Thomas Pugh)
